1. Child Pose/ Shishuasana

Steps-

1. Kneel on the floor with your toes together and your knees hip-width apart. Rest your palms on top of your thighs.
2. On an exhale, lower your torso between your knees. Extend your arms alongside your torso with your palms facing down. Relax your shoulders toward the ground. Rest in the pose for as long as needed.
3. Stay anywhere from 30 seconds to a few minutes. Beginners can also use shishuasana to get a taste of a deep forward bend, where the torso rests on the thighs. Stay in the pose from 1 to 3 minutes.

2. Adho Mukha Svanasana/ Downward facing dog pose

Steps-

1. Come onto the floor on your hands and knees. Set your knees directly below your hips and your hands slightly forward of your shoulders. Spread your palms, index fingers parallel or slightly turned out, and turn your toes under.
2. Exhale and lift your knees away from the floor. At first keep the knees slightly bent and the heels lifted away from the floor. Lengthen your tailbone away from the back of your pelvis and press it lightly toward the pubis. Against this resistance, lift the sitting bones toward the ceiling, and from your inner ankles draw the inner legs up into the groins.
3. Then with an exhalation, push your top thighs back and stretch your heels onto or down toward the floor. Straighten your knees but be sure not to lock them.

Firm the outer thighs and roll the upper thighs inward slightly. Narrow the front of the pelvis.

4. Firm the outer arms and press the bases of the index fingers actively into the floor. From these two points lift along your inner arms from the wrists to the tops of the shoulders. Firm your shoulder blades against your back, then widen them and draw them toward the tailbone. Keep the head between the upper arms; don't let it hang.
5. Adho Mukha Svanasana is one of the poses in the traditional Sun Salutation sequence. It's also an excellent yoga asana all on its own. Stay in this pose anywhere from 1 to 3 minutes. Then bend your
